

Tata Data Analytics Virtual Internship – Task 3

This repository contains my **Task 3 Business Summary Report** for the Tata Data Analytics Virtual Internship.

The report translates predictive model insights into a clear, actionable strategy for Geldium's Head of Collections.

Report Focus

- Identify high-risk customer segments
- Provide SMART, business-ready recommendations
- Address fairness, explainability, and responsible AI use

File: Task3_Business_Summary_Report_Formatted.docx

□ GenAI Prompt Used

"Create a 2-page business summary report for the Head of Collections using insights from EDA and predictive modeling. Identify at-risk segments, provide a SMART recommendation, and address ethical considerations like fairness and explainability using plain, professional language."

Outcome

A structured, non-technical report connecting data insights with real-world decisions in financial services.
