Tata Data Analytics Virtual Internship 2025 – Task 1

This repository contains my submission for **Task 1** of the Tata Data Analytics Virtual Internship 2025. The task focused on **Exploratory Data Analysis (EDA)** using the **Geldium dataset** provided through the GNI (Generative Natural Intelligence) platform.

📌 Task Objective

To perform data quality assessment and identify issues in the dataset such as:

- Missing values
- Inconsistent entries
- Outlier detection
- Basic statistical summaries

🛠 Tools & Platform Used

- **GNI (Generative Natural Intelligence)** platform
- Prompt-based EDA
- Dataset uploaded in CSV format
